The first all natural facial tanning accelerator that can also be used as a daily moisturizer!

Because the face is more sensitive and needs a different mix of nutrients, anti-aging compounds and tanning accelerators, we created Joli Visage. This all natural formula promotes a safe tan and leaves skin velvety soft and supple. Your customers will see and feel the difference in just a few applications.

## Physician developed Glimra: The industry standard for natural indoor tanning.

For tanners interested in the healthiest all natural tan they can achieve, there's one choice: Glimra. These indoor tanning crèmes promote a deep, dark tan while providing powerful anti-aging moisturizers and nutrients that help rebuild the skin. Glimra's unique blend of natural herbal and botanical extracts help protect skin from the premature aging that can be caused by exposure to UV light. No other natural tanning crèmes even come close!

## A natural after tan maximizing crème for every tanner!

It's just as important to nourish the skin after tanning. Glimra's After Tan Maximizing Crème provides the skin with the specific nourishment needed to stay glowing, soft and supple. Help your customers extend the life of their tan!

After Tan Maximizing Crème

All Skin Types, All Tan Levels

## The first bronzers to combine walnut and caramel extracts with the power of Melanin!

Now your customers can push their tan way past the limits – naturally. The unique synergy created by our mix of natural ingredients will give any tanner a deeper color than they ever imagined!

## Introducing Sun Soothe. An all natural tingle and sunburn neutralizer for tanners who over do it indoors or outdoors.

If ever your customers wish they could feel the difference, it's when they over do it in the tanning bed or in the sun. Now you can offer them immediate relief with Sun Soothe. This all natural analgesic provides comforting relief to overexposure with natural cooling extracts. Our researchers didn't stop there. They have discovered a unique formula utilizing a Peruvian tree sap, called Zangrado™, that soothes the nerves under the skin to create a long-lasting relief.
