

## How do you stay healthy, young and vital?

At this time, There are multiple theories on why we age. In order to truly see a slowing of the aging process, all of these theories must be addressed. Viogenix Corporation has created what we believe to be the ULTIMATE anti-aging system.

Our overall level of health and the rate at which we age can be distilled down to two components, anabolic activity and catabolic activity. Anabolic activity includes the building up and repairing of our body. Catabolic activity is that which breaks down or degenerates our body. The various theories of aging describe the reasons for catabolic activity. As long as our overall anabolic level is higher than our catabolic level, we are winning the game. The goal of our anti-aging system is to enhance anabolic activity, at the same time, decrease catabolic levels.

Extensive research and development has gone into our product line. We select, prepare and combine the most effective ingredients to achieve our goals. Add to this a nutritious diet and an exercise program, and the watch the years reverse!

### Theories of Aging

**The Neuroendocrine Theory** - As we get older, certain hormone levels start to decline. At the same time, the receptor sites for these hormones start to become less sensitive. This decreases our cells ability to function properly. While some hormones are declining, other hormones start to increase, which can damage our bodies.

**The Membrane Theory of Aging** - As we age cell membranes become more rigid. This leads to an accumulation of toxins. Cell membrane rigidity and toxin accumulation interfere with cell communication, causing lower energy levels and disturb vital chemical processes.

**The Cross-Linking Theory** - Simple sugars and proteins bind in the body and cause what is known as cross-linking. This binding prohibits proteins from performing efficiently, and cause congestion in the body.

**The Free Radical Theory** - Poor lifestyle choices, environmental toxins, as well as natural processes such as breathing and eating all cause the production of free radicals in our bodies. These free radicals attack our cells and decrease their ability to function.

**The DNA & Genetic Theories** - Our DNA, or genetic code, has a predetermined rate of aging. This can be slowed or accelerated based on lifestyle choices. Both free radicals and cross-linking damage our DNA.

**The Hayflick Limit Theory** - Cells have a limit in the number of times they can divide before they die off. Poor lifestyle choices can speed up the divisions and therefore speed up cell degeneration and death.

**The Mitochondrial Decline Theory** - Mitochondria are the powerhouses found in every cell. The mitochondria can become damaged, and this decreases the energy and efficiency of the cell.

The ability to control the aging process is now in your hands. With our rejuvenation system, Evolution 2, you can begin to enjoy the benefits of a youthful and active lifestyle. Begin living life to the fullest again while helping us share this positive message with others.

*"I have been using my products, and I love them. I really can tell a difference when I wake up in the morning - especially the skin on my face. I don't seem to have those dark circles under my eyes as much, and my wrinkles seem to be smoothed out - it is amazing".*  
— Michele M., Florida

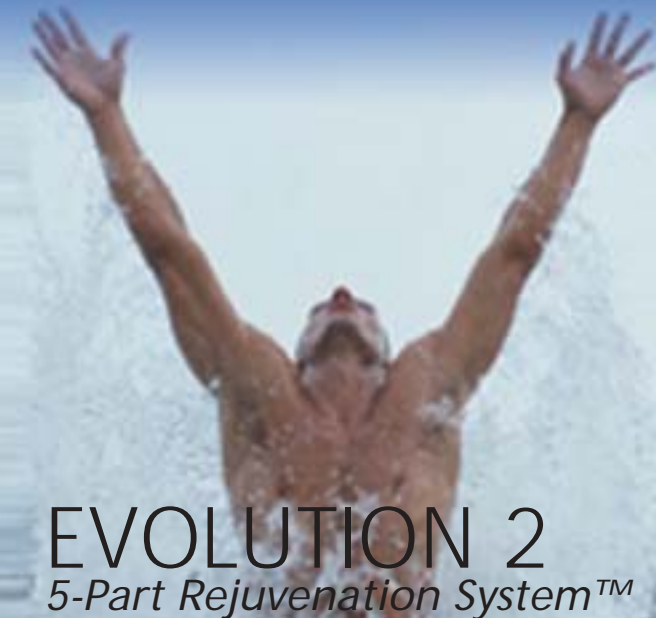

# VIAGENIX™

## Look Younger, Feel Better

What would you give to look and feel young again? How would your life be different if you had the vitality and boundless optimism of youth? It is proven fact that if you do nothing you will experience the signs and symptoms of aging. With Evolution 2 you can slow-down, stop or even reverse the aging process.

***Now you have a choice!***

## EVOLUTION 2 5-Part Rejuvenation System™

I have fibromyalgia. I haven't slept in over 10 years. I have been using the Elements I and II for over a month now, and I have been sleeping most of the nights very deeply. My "alligator" skin is looking a lot better, and I am using less lotion. I do a lot of walking up and down stairs here at work. By the time I get to the top of the stairs my knees would burn like they were on fire. This morning I noticed they aren't burning anymore.

— Michele P., Washington

I didn't expect to see many results as I have been on high quality health supplements for over 7 years. Much to my surprise I have seen many great results. My skin is becoming soft and subtle like it was when I was young. The age spots on my forehead are gone. A red patch on my leg where I had a wound has finally healed. I am losing weight and also have an increased desire to go out and exercise. I have a sense of well being that I cannot describe.

— Julie M. Washington

## The Liposome The Perfect Means of Transportation!

You've probably heard the saying, "You are what you eat." Well, the truth of the matter is, "You are what your body absorbs."

### Nutrients Delivered Directly to the Cellular Level

This is why we have utilized the World's most innovative carrier technology — liposomes. Liposomes are extremely complex, microscopic spheres. They house multiple layers like an onion. They are so small that you can fit 50 of them side-by-side across the diameter of a piece of hair.

Liposomes act as the carrier of the active ingredients that are imbedded in them – in this case, various nutritional supplements. This liposomal delivery system protects the nutrients during transit through the gastrointestinal tract and permits a high rate of absorption. The liposome also enhances the activity of the nutrients that it delivers. This means that the body is receiving a higher percentage of the nutrient, as well as a more active nutrient. Think of it as an armor piercing bullet, delivering the regenerative power of EVOLUTION 2 directly to the cellular level where maximum results can be obtained. Youth wrapped in a delivery system to penetrate and rejuvenate your whole being!

These tiny engineered liposome membranes are made from highly purified lecithin which controls the liposomal internal environment and acts as a gatekeeper,

gradually releasing the nutrients into the body. Because of the multi-layered makeup of the liposome, as each layer dissolves, it releases its nutrients for use by the cells. This sustained release over many hours is a more effective way for the body to assimilate the nutrients and maximize the absorption rates. The body starts to fail, such as the associated organs.

This means that the body is receiving a higher percentage of the nutrient, as well as a more active nutrient.

### Element I HGH Potentiator

- Enhances HGH production and release from the pituitary gland.
- Promotes tissue and cell health in the muscles, bones.
- Supports neurotransmission, which improves mental alertness and mood.
- Increases energy and stamina.
- Sharpens the body's ability to burn off excess fat.
- A libido booster.
- Diminishes the appearance of fine lines and wrinkles.

### Element II Vitamin, Mineral, Enzyme Complex

- Provides an array of vitamins, minerals and enzymes for building and nurturing a healthy body.
- Enhances absorption and nutritional value of foods.
- Helps to meet the nutritional and energetic demands of our high-stress society.
- Beneficial for the skin and hair.
- Assists in all biochemical processes that occur in the body.
- Optimum digestive enzyme complex to unlock the power in your food and break-down undigested food in the blood.

### Element III Brain Nutrient Complex

- Protects brain cells from free-radical and toxin damage, and enhances brain function.
- Increases oxygen absorption and enhances focus.
- Nourishes your body's "power cells" and improves brain's metabolic rate.
- Maintains healthy blood circulation and cognitive functioning.
- Enhances memory and mood.
- Power components for the brain.
- Key nutrients for those who desire to keep an alert mind and a sharp memory.

### Element IV Cell Health and Immune Booster

- Energizes and balances your immune system to function at its best.
- Helps your body keep up with the everyday demands on your immune system.
- Assists cellular membranes in maintaining proper electrical energy and nutrient transfer across cell membrane.
- Assists in cleansing the cells of environmental toxins.
- Supports optimal functioning at the cellular level.

### Element V Cell Guardian Anti-oxidant

- Contains high content of OPCs that are some of the most potent antioxidants known.
- Recharges the scavenging activity of antioxidants and enhances the body's natural antioxidant systems.
- Maintains elasticity and integrity of healthy blood vessels and connective tissue.
- Helps reduce the buildup of free radicals from environmental pollution.
